

## Foam glass / Cellular glass Pipe Sections

Foamglass / Cellular glass pipe sections are prefabricated pipe insulation for various pipe sizes specially used in industrial pipeworks allowing fast installation thereby reducing manhours and increase efficiency. Fibreglass / Cellular glass pipe sections conforms to ASTM C 552, ASTM C 1639, EN 14305 to suit your requirements.

These pipe sections are applied dried with joint sealant and fixed with stainless steel straps.

Applications	Industrial, Oil & Gas, Power Plants, Food Industries.
Sizes	25 mm to 450 mm
Thickness	25 mm – 160 mm (Single or Multilayer)
Density
